

ABSTRACT OF THE DISCLOSURE

A tube is provided for containing a product to be squeezed from the tube when the tube is used in conjunction with a wrapping tool. The tube has a deformable main body for storing the product prior to the product being squeezed from the tube, the main body having a longitudinal direction, a transverse direction perpendicular to the longitudinal direction, a first end and a second end opposite the first end in the longitudinal direction of the main body. The tube has an opening at the first end of the main body, the opening being an outlet for the product when the product is squeezed from the tube, and a seal at the second end of the main body, the seal having a contour, the contour having a bearing surface that is non-parallel to the longitudinal direction of the main body. The bearing surface is for receiving a wrapping force from the wrapping tool for wrapping the main body around the seal.
